

NEWS RELEASE

6th august 2009

For immediate use

SUPERIOR STYLISH AND SEASONAL SCREENS

Superior Screens has a new range of aluminium profiles – slatting plus fixed and adjustable louvres to provide flexible protection from sun glare and those prying eyes from the neighbours.

The aluminium slats and louvres can be used as sunscreens for decks and patios, window screens, the basis for fencing and gates, awnings and gables.

They are designed for long-term, quality solutions to endure all weather conditions.

Superior Screens General Manager, Ms Rita Turnour, said the new aluminium range provides builders and home renovators with a versatile solution when choosing a screening application.

“Aluminium slats and louvres can increase or decrease the amount of breeze, natural light and privacy in the home or office,” Ms Turnour said.

All aluminium slats and louvres have a high resistance to corrosion and weathering and produce tremendous reflectivity to heat and light.

They are light-weight yet strong, low maintenance and incredibly durable.

All slats and louvres are custom-made to fit and are available in a wide range of colours, including woodgrain and anodised finishes.

Superior Screens is Australia’s leading producer of COLORBOND® steel and aluminium screening products providing innovative sun control and shade solutions for commercial and residential properties.

Superior Screens has a national network of distributors – for your closest, please call 1300 766 799 or visit www.superiorscreens.com.au

Ends.
